

PAS Certified Product Re-Used by Public

A range of PAS 100 Certified (Publicly Available Specification) Specialist Peat-Free Growing Media, Fertilisers and Soil Improvers are the end product of our unique state of the art composting process.

We combine various grades of composted materials with UK sourced sustainable ingredients to produce a re-cycled organic range of growing aids for the Greener Gardener.

An important part of the service we offer is the high quality, environmentally friendly products we produce and our unwavering commitment to the Greener Gardener and the wider environment.

Our Website www.vitalearth.tv not only promotes our wide range of PAS Certified Peat-Free Specialist Growing Media but also is filled with information on the impact of choosing a Peat-Free alternative and profiles organisations that share Vital Earth's ethos.
